ECO - SYSTEM

Apertura su freddo | Cold opening

La leva di regolazione ed erogazione dell'acqua in un miscelatore monocomando tradizionale è posizionata in modo da attivare alla sua apertura l'immediata erogazione di acqua miscelata e quindi richiedendo acqua calda anche se non necessaria, con un conseguente impiego di energia.

Con i miscelatori monocomando dotati di cartucce "ECO-SYSTEM" la leva di erogazione è posizionata per erogare solo acqua non miscelata, che viene gradualmente a riscaldarsi, richiedendo quindi energia, solo mediante il suo spostamento a sinistra.

In a single-lever traditional mixer handle opening immediately activates mixed water, requiring hot water flow even if not necessary, with a consequent use of energy.

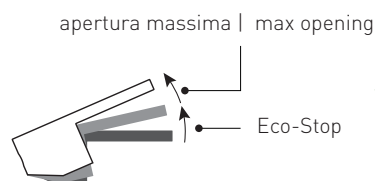

In ECO single-lever mixers, equipped with "ECO-SYSTEM" cartridges, the handle is positioned to dispense unmixed water only, which gradually heats up, requiring energy, by moving handle to the left only.

GREEN

SOLUTIONS

In un miscelatore monocomando dotato di cartucce "WATER-SAVING" la leva di erogazione si apre con un doppio scatto: il primo permette di limitare al 50% il flusso massimo di acqua miscelata, che diventa massimo solo alla completa apertura. La temperatura dell'acqua si regola nella modalità classica ruotando la leva a destra o a sinistra sino al raggiungimento desiderato.

In a single-lever mixer equipped with "WATER-SAVING" cartridges, the handle opens with a double click: the first limit to 50% the mixed water flow, becoming 100% when fully opened only. Water temperature adjusting according to the classic mode by turning handle right/left until desired one.

Finitura unica nel suo genere. Una ossidazione dell'ottone grezzo ottenuta tramite un bagno di bronzatura il cui risultato finale è un pezzo esclusivo che non garantisce uniformità cromatiche con pezzi diversi per ciascun trattamento.

Unique finishing, consisting in an oxidation of the raw brass through a bronzing galvanic bath whose final result is an exclusive finishing with any guarantee of colour uniformity for each single unit of the same treatment lot.

NU

Finitura ottenuta mediante la spazzolatura dell'ottone con mole abrasive, successivamente trattato con una vernice opaca trasparente. Il pezzo deve essere asciugato dopo ogni utilizzo per mantenere invariate le sue caratteristiche.

Finishing obtained by abrasive wheels brushing, afterwards treated with a transparent matte varnish. This finishing requires drying after each use to keep it unchanged.
